FACT SHEET # 1

HOW DO I KNOW IF I HAVE A HEARING LOSS?

By Linda S. Heller, M.A.C.C.A.,C.M.,CAPS (Ret)

The signs and symptoms of hearing loss depend on the type, degree and cause of your hearing loss. Here are some questions to ask your self or a friend!!

1. Do you have difficulty hearing tv or radio or meetings easily?
2. Is understanding people, women or children difficult?
3. Do you often miss words in conversation?
4. Do you have to ask people to repeat or clarify?
5. Do you find you must stare at people to hear?
6. Do you tend to bluff or fake that you understood?
7. Is it much harder to hear in background noise?
8. Do you sometimes depend on a friend or family to help?
9. Do you hear but not understand?
10. Do other people think you have difficulty hearing?

If you answer yes to any question, get a hearing test!
