HOW DO YOU KNOW IF YOUR HEARING AID IS FITTED RIGHT?

By Linda S. Heller, M.A.C.C.C.A.,C.M.,CAP-S (Ret)

Whether a person finds a hearing aid helpful or not depends on many factors. Here are just a few questions that need answers!

1. Does the hearing aid help when I need it the most?
2. How experienced is the professional that fitted you?
3. How much understanding does a person have with and without hearing aids in noise and in quiet?
4. What expectations do you have about what the hearing aid can do?
5. How flexible is your hearing aid in meeting your hearing and listening needs?
6. Were you tested in background noise with your hearing aid?
7. How well do you function with and without hearing aids ? How much does hearing aid help in you hear in a noisy place?
8. How often are you wearing the hearing aid?
9. How long have you not been hearing well before you go a hearing aid?
10. Have you used a hearing or other assistive listening devices before?
11. If you've been wearing a hearing aid, how long since you have had the program checked to match your current hearing and listening needs?
12. Do your family and friends think you are hearing well with your hearing aid?
